Title of Your Thesis in Title Case

Subtitle, If Applicable

By

Your Full Name

BSc in Computer Science

Student Number: 12345678

A thesis submitted in partial fulfilment of the requirements for the degree of

Master of Science in Artificial Intelligence

Department of Computer Science and Engineering

School of Science and Engineering

University of Kurdistan Hewlêr

MSc

May 2027

Erbil, Kurdistan

Declaration

I hereby declare that this dissertation/thesis entitled: “Title of Your Thesis in Title Case: Subtitle, If Applicable” is my own original work and hereby certify that unless stated, all work contained within this is my own independent research and has not been submitted for the award of any other degree at any institution, except where due acknowledgement is made in the text.

Signature: _____

Name: Your Full Name

Date: _____

Examining Committee Certification

We certify that we have read this dissertation/thesis: 'Title of Your Thesis in Title Case: Subtitle, If Applicable' and as a committee have examined the student 'Your Full Name' in its content and what is related to it. We approve that it meets the standards of a dissertation/thesis for the degree of 'MSc' in 'Artificial Intelligence'.

Dedication

To my family, for their patience and support.

Your Name
Year

Acknowledgements

Thank your supervisor, the people who helped with data or evaluation, your classmates and your family. Mention any funding or institutional support here.

Abstract

State the problem and why it matters. Describe how you investigated it: the data, methods and evaluation. Give the main results with numbers, and the contribution your work makes to knowledge in the field. End with the main conclusion.

Keep it to a single page of A4. Do not include citations or references.

Keywords: keyword one, keyword two, keyword three, keyword four

Chapter 1 Introduction

This chapter introduces the topic. It gives the background to the problem so that readers understand why the work matters, relates the thesis to other work in the field, and points to the main findings and contributions.

Write paragraphs as normal text with a blank line between them. The template adds the space between paragraphs and the one and a half line spacing for you, so never add manual spacing.

1.1 Problem Statement

State clearly the problem your work answers. Keep it focused and concise.

1.2 Objectives

List specific, measurable and achievable objectives, for example:

1. Build a test set for the task.
2. Compare two or more methods on that test set.
3. Analyse where each method succeeds and fails.

1.3 Thesis Organisation

Give a short description of each chapter. Chapter 2 reviews related work, Chapter 3 describes the method, Chapter 4 the experiments, Chapter 5 the results and Chapter 6 the conclusions.

1.4 Summary

Each chapter may end with a short summary (optional).

Chapter 2 Literature Review

The literature review tells the story of the work your thesis builds on. Group studies by theme, compare them, and show the gap that your work fills.

2.1 Citing Sources with Page Numbers

UKH requires a page number in every in-text citation, whatever the referencing style (Guideline 1c). Put the page in square brackets before the key:

```
\parencite[p.~9461]{lewis2020rag}
\textcite[p.~425]{jarvelin2002cumulated}
\parencite[pp.~758--759]{cormack2009reciprocal}
```

These give (Lewis et al., 2020, p. 9461), then Järvelin and Kekäläinen (2002, p. 425), and (Cormack et al., 2009, pp. 758–759).

Direct quotations longer than about forty words go in a `quote` environment, which is single spaced as the guidelines require:

> An indented quotation is set with single line spacing, as Guideline 3d asks. Give the source and page number at the end (Mahmudi et al., 2023, p. 2).

2.2 Writing Kurdish Text

Sorani Kurdish in Arabic script works out of the box. Inside an English sentence use `\textkurdish{...}`, for example زانکۆی کوردستان هەولێر (University of Kurdistan Hewlêr). For a whole right-to-left paragraph, such as a quoted line of poetry, use the `kurdish` environment:

ئەمە نموونەیەکە بۆ نووسینی دەقی کوردی لە ناو نامەی ماستەردا. پیتە تایبەتەکانی کوردی: ڕ ڵ ێ ۆ ە ڤ.

Kurdish studies relevant to this kind of work include information retrieval (Esmaili et

al., 2014, p. 3) and poetry analysis (Mahmudi et al., 2023, p. 1).

2.3 Summary

Summarise the gap in the literature that your thesis addresses.

Chapter 3 Methodology

Describe the theory, design and methods of your work in enough detail for someone else to repeat it.

3.1 Equations

Write equations with LaTeX, never paste them as images (Guideline 6b). Each equation sits on its own line and is numbered within the chapter:

$$\text{nDCG@}k = \frac{1}{\text{IDCG@}k} \sum_{i=1}^{k} \frac{2^{rel_i} - 1}{\log_2(i+1)} \tag{3.1}$$

Refer to it in the text as equation 3.1.

3.2 Figures

Figures are numbered within the chapter and their captions are centred underneath, in 10 pt type (Guideline 6a). Figure 3.1 is drawn with TikZ; for an image file, put it in the `figures` folder and use `\includegraphics`.

Figure 3.1: The three stages of the study

3.2.1 Sub-sections

Sub-sections are numbered 3.2.1, 3.2.2 and so on. The guidelines allow no deeper numbering; use bullet points instead.

3.3 Summary

Summarise the method.

Chapter 4 Experimental Work

Describe the data, the experimental set-up and the evaluation measures.

4.1 Tables

Table captions are centred above the table in 10 pt type, and the table text is single spaced (Guidelines 3d and 6a). Keep tables within the text width; put a very wide table on its own landscape page.

Table 4.1: Example of a results table

Method	Recall@5	MRR@10	nDCG@10
Keyword (BM25)	0.82	0.71	0.74
Embedding	0.64	0.52	0.57
Hybrid	0.86	0.75	0.78

Refer to tables in the text as table 4.1.

4.2 Summary

Summarise the experimental set-up.

Chapter 5 Results and Discussion

Present the results, then explain what they mean, why they came out this way, and how they compare with earlier work.

5.1 Main Results

Report numbers with their tests of significance where appropriate.

5.2 Discussion

Discuss strengths, weaknesses and threats to validity.

5.3 Summary

Summarise the findings.

Chapter 6 Conclusions and Recommendations

6.1 Conclusions

Answer the objectives from Chapter 1 one by one.

6.2 Recommendations and Future Work

Suggest what should be done next.

Glossary

Corpus

A large, structured collection of texts used for study or training.

Embedding

A list of numbers that represents the meaning of a text.

Retrieval

Finding the documents most relevant to a query.

Appendix 1 Ethical Consent Approval Form

Insert the signed Ethical Consent Approval form here, for example as a scanned PDF:

Appendix 2 Additional Material

Appendices hold long supporting material that would interrupt the main text, such as questionnaires, full result tables or code listings.

2.1 Long Appendix Sections

Sections inside an appendix are numbered Appendix 2.1, 2.2 and so on, and appear in the table of contents.
